

UPDATE ON RESTORATION AND REPAIRS

A quick update on the repairs and restoration of our building following the multiple water line breaks behind the platform, in the ladies lobby restroom, and in the youth room on Christmas Day.

Repairs have been made to the plumbing, and remediation and demo has been completed, ready for drywalling, paint, flooring and fixtures.

We are in the process of obtaining estimates to not only restore the space, but improve the area to do everything possible to avoid such an occurrence in the future.

It became apparent that in order to be good stewards of our beautiful facility, we wanted to carefully consider every aspect of repair and replacement.

We have a wonderful group of volunteers assisting us with advice and their knowledge to accomplish our goals and we are so thankful for them.

We will keep you informed as we work through this long drawn out and costly process.

God is good!

The Elders and Leadership of NWC
